

The Next Generation in Topical Dosing Technology

1. CLICK-Assist™ Feedback

The CLICK-Assist Patient Feedback System is the next step in automated CLICK-Dose™ technology aimed to improve patient compliance and therapy outcomes.

A proprietary Super-CLICKer™ mechanism is at the heart of this 2nd generation dosing system. This innovation provides stronger audible CLICKs, heavier tactile dosing sensations and improved visual indicators. As a result, the patient will enjoy a more responsive dosing experience.

2. Ergonomic Design

A friction-free domed applicator pad with an ergonomic dispensing design provides a comfortable experience when applying medication (0.25 mL/CLICK)(~2.5mL residual) directly to specific therapy zones. All Topi-CLICK® patient-friendly devices reduce the risk of cross-contamination of medication to loved ones and pets since no medication comes in contact with the hands during application. Elegantly designed and easy to operate, Topi-CLICK® applicators rest comfortably in the hand and provide a repeatable and accurate dose each time.

Super-CLICKer™

Topi-CLICK 35 dispensers continue to raise the bar in topical dosing technology.

[REFILL-Badge™]

Top of REFILL badge (12 CLICKs remaining)
Bottom of REFILL badge (32 CLICKs remaining)

3. Enhanced Visual Indicators

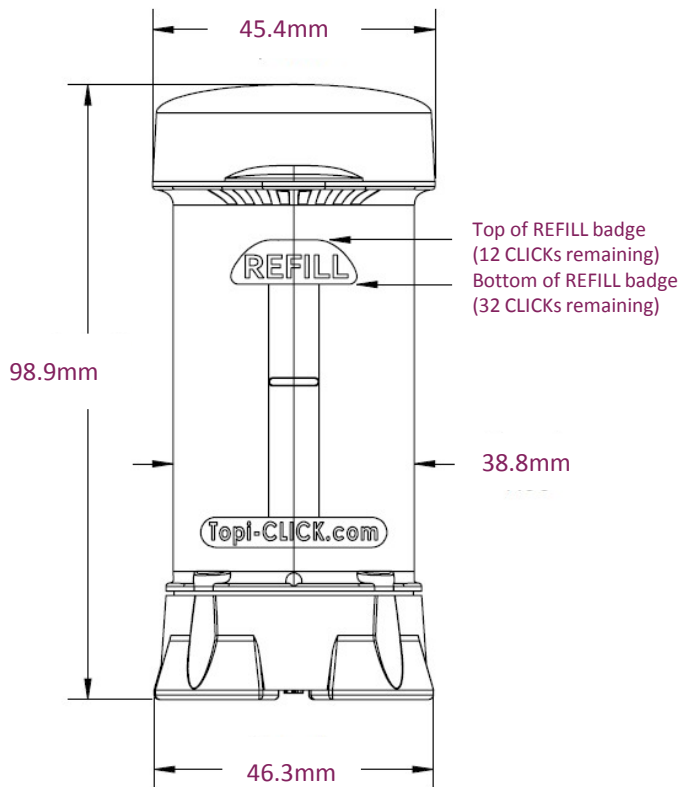

The new Topi-CLICK® 35 comes wrapped in a textured polypropylene skin with polished visual markers. The [REFILL-Badge™] is now twice the size for even better refill awareness and guidance. A polished indicator window provides a full length view of the medication level for easy volume identification.

All new next generation Topi-CLICK® dispensers come with a [recycle code](#) molded on the base for easy recycling information.

Proven dosing technology – millions and millions used yearly and growing.

4. Specifications & Improvements

Topi-CLICK® 35 is a FDA registered device. Polypropylene construction with a UV Blocker to protect medication from harmful UV rays. Topi-CLICK is a single-use device.

Features

5. The Syringe With A CLICK

- » Designed for Patients & Pharmacists
- » Easy to Fill – Easy to Apply – Easy to Clean
- » Designed for Topical Measurements vs. Designed for Liquid Measurements
- » Automated Dosing vs. User-Variable Dosing
- » Simplifies Packaging and Workflow

6. Topi-CLICK® vs. Syringe

Feature	Topi-CLICK®	Syringe
Technology	Innovative (new technology)	Antiquated (centuries old technology)
Design	Patient Friendly (ergonomic functional design)	Patient Neutral (old useable design)
Dosing	Automated Fix-Metered Plunger (accurate/repeatable)	Free Moving Plunger Dosing (user variability with each dose)
Appearance	Elegant, smooth lines – built for convenience and travel	Associated with disease/addiction - stigma
Usability	Easy-to-Use (Click-Assist patient feedback)	Easy-to-Use (traditional tube/plunger – no assist technology)
Clean-Up	No clean-up necessary – replace cap	Clean-up required - including hand washing
Cross-Contamination	Very minimal risk if any	Increased risk to humans and pets
Waste	No waste: same dispenser used throughout treatment	Waste: multiple syringes, wipes, gloves, etc..

7. Ordering Information

Order Online at www.Topi-CLICK.com
