Step 1: Filling
Syringe Tip-to-Tip Filling - Screw Luer syringe to the Luer lock tip of the Micro®. Requires no extra Luer Lock adaptor.

EMP Jar Quick-fill Adaptor™ Filling - Screw on Topi-CLICK Micro® EMP Jar Quick-fill Adaptor™. Fill topical medications directly from mixing jar with this added Micro® accessory.

Step 2: Applicator Tip Attachment - Select Applicator Tip and press on by pushing straight down (important) against a hard surface.

Step 3a: Priming
Prime the Micro® by turning/CLICKing the base until contents are dispensed, then wipe off. Be sure to align Micro® base with the triad tube. Approximate Priming: 0.15 mL or 3 CLICKs.

Step 3: Priming the Micro®
Advance the actuator to engage plunger by manually turning/CLICKing base. The Actuator Bar should seat completely to the plunger before priming. Actuator can also be advanced by using a mini cordless screwdriver to speed up the process (200 RPM Max). A Micro Driver Socket Bit™ can be purchased for faster actuator advancement with a cordless mini screwdriver. (See Advancing Actuator Instructions.)

Step 4: Cap Placement
Screw on cap securely to protect tip and prevent evaporation.

Step 5: Label Application
Apply above the base opposite the “REFILL Badge” indicator.

Dispense/CLICK: 0.05 mL
Dispenser Volume: Up to 9.75 mL
Total Delivery Volume: Up to 9.45 mL
Approx. Residual: 0.15 mL
Approx. Priming: 0.15 mL or 3 CLICKs

Note: Graduated Lines are for filling only and not for patients. Top black line of the plunger indicates Fill Volume. The embossed Refill Badge helps patients reorder medication in a timely manner.
