

Topi-CLICK Recycling Information

Disposing or Recycling Topi-CLICK's®

DoseLogix is continually striving to improve our environmental compatibility. All our products are 100% recyclable. We use a few different plastics, each having different recycling requirements, so please be sure to follow the listed codes when recycling our products if they are empty, unused, or have been suitably cleaned of any pharmaceutical residue.

If you are trying to dispose of a Topi-CLICK® with medication or medication residue in it, please see “**Disposing of Topi-CLICKs® with Expired or Unused Medication**” on the next page. Proper disposal of medications helps reduce the environmental accumulation of medications and their degradation byproducts.

Recycling Information for Unused & Empty Topi-CLICKs®

Product	Material	Recycling Code
Topi-CLICK® 35, 3-Port™, Light SAFE™, DoseCheck™, and Topi-CLICK 140	Polypropylene	
Topi-CLICK Perl®	Perl® Dispenser/container – Polypropylene Perl® Vaginal Applicator – LDPE (Low Density Polyethylene)	 
Topi-CLICK Micro®	Several plastic materials	

We do not accept any Topi-CLICK® devices back for recycling or disposal. More information can be found on our website here: <https://doselogix.com/recycling-info>.

See next page for instructions on disposing of Topi-CLICKs® with Expired or Unused Medication.

Disposing of Topi-CLICKs® with Expired or Unused Medication

FIRST, ask your pharmacy for any disposal advice. They are familiar with your formulation and should be the most knowledgeable about the disposal requirements for your state. Regulations vary from state to state and may be more stringent than Federal regulations.

Ask your local pharmacy (hospital, retail, or clinic) if they provide a service or receptacle to dispose of pharmaceutical waste for their patients. If you live in a state that allows pharmacies to recycle your compounded medication, please check [here](#) to locate nearby pharmacies that will help dispose of them.

CVS and Walgreens may have drug disposal kiosks available to use. The National Association of Boards of Pharmacy (NABP) maintains a database of drug disposal locations [here](#) that includes these locations as well as partnered law enforcement agencies.

Law enforcement locations may have a box for drug disposal or have a take-back program in place. Please check with them to verify if they have one in place.

Prior to disposal, be sure to destroy personal information on the prescription label. Tear off and shred the entire label or the parts containing personal information. You may also use a black permanent marker to hide personal information.

What does the FDA recommend?

- Almost all medicines can be safely disposed of by using medicine take-back programs or using U.S. Drug Enforcement Agency (DEA)-authorized collectors.

DEA Take-Back Events for controlled substances

- Every year the DEA has national Take-Back days. They typically happen twice per year (once in April and once in October). Check [here](#) to see when the next scheduled Take-Back event will occur.
- Law enforcement may conduct Take-Back events at any time outside of the typical biannual events.
- For detailed information, visit the [DEA website](#).
